

Important Update: Covid-19

Our Hoo-Haz network is still open as we continue to play a pivotal role in the facilitation of share economy activities throughout Australia. Our network remains open and we have been actively monitoring Government and World Health Organisation (WHO) advice regarding COVID-19 (coronavirus). We want to take a calm and balanced approach, while implementing meaningful actions that prioritise the health and wellbeing of our people, customers and the community.

Protecting Our Customers, Our People & Our Community

At Hoo-Haz we continue to request our Hazzers maintain and clean their equipment to the highest standards. We recommend Hazzers and Renters implement additional cleaning procedures for all equipment prior to hiring and prior to returning of hire, including antibacterial cleaning of any surfaces which may receive regular contact.

Our staff and Hazzers are being regularly updated with any additional hygienic tasks suggested by the Australian Government or WHO.

We highly recommend keeping your homes and equipment sanitised - to help keep workspaces and each other safe.

We are encouraging social distancing for Hazzers and Renters and ask you to refrain from direct contact or hand shaking.

We continue to ask our staff, Hazzers and Renters to take leave, avoid contact and maintain social distancing if they experience any cold or flu symptoms.

Assisting Our Customers, Our People & Our Community

We have equipped our staff with technology, including remote meeting solutions, so they can continue working. This helps encourage social distancing and maintains our social responsibility to others within our community.

What We Ask of You

Hoo-Haz is 100% Australian owned and managed, we pride ourselves on the continual commitment we make to our people, our customers and our communities.

If you are diagnosed with COVID-19 we ask that you follow the government COVID guidelines in order to keep all the members of our Hoo-Haz community safe.

If you have any questions or concerns, please reach out to our team on help link

Stay safe, and keep looking out for each other.

Protect yourself and others from the spread COVID-19

You can reduce your chances of being infected or spreading COVID-19 by taking some simple precautions:

- Regularly and thoroughly clean your hands with an alcohol-based hand rub or wash them with soap and water. Why? Washing your hands with soap and water or using alcohol-based hand rub kills viruses that may be on your hands.
- Maintain at least 1 metre (3 feet) distance between yourself and others. Why? When someone coughs, sneezes, or speaks they spray small liquid droplets from their nose or mouth which may contain virus. If you are too close, you can breathe in the droplets, including the COVID-19 virus if the person has the disease.
- Avoid going to crowded places. Why? Where people come together in crowds, you are more likely to come into close contact with someone that has COVID-19 and it is more difficult to maintain physical distance of 1 metre (3 feet).
- Avoid touching eyes, nose and mouth. Why? Hands touch many surfaces and can pick up viruses. Once contaminated, hands can transfer the virus to your eyes, nose or mouth. From there, the virus can enter your body and infect you.
- Make sure you, and the people around you, follow good respiratory hygiene. This means covering your mouth and nose with your bent elbow or tissue when you cough or sneeze. Then dispose of the used tissue immediately and wash your hands. Why? Droplets spread virus. By following good respiratory hygiene, you protect the people around you from viruses such as cold, flu and COVID-19.
- Stay home and self-isolate even with minor symptoms such as cough, headache, mild fever, until you recover. Have someone bring you supplies. If you need to leave your house, wear a mask to avoid infecting others. Why? Avoiding contact with others will protect them from possible COVID-19 and other viruses.
- If you have a fever, cough and difficulty breathing, seek medical attention, but call by telephone in advance if possible and follow the directions of your local health authority. Why? National and local authorities will have the most up to date information on the situation in your area. Calling in advance will allow your health care provider to quickly direct you to the right health facility. This will also protect you and help prevent spread of viruses and other infections.
- Keep up to date on the latest information from trusted sources, such as WHO or your local and national health authorities. Why? Local and national authorities are best placed to advise on what people in your area should be doing to protect themselves.

Safe use of alcohol-based hand sanitizers

To protect yourself and others against COVID-19, clean your hands frequently and thoroughly. Use alcohol-based hand sanitizer or wash your hands with soap and water. If you use an alcohol-based hand sanitizer, make sure you use and store it carefully.

- Keep alcohol-based hand sanitizers out of children's reach. Teach them how to apply the sanitizer and monitor its use.
- Apply a coin-sized amount on your hands. There is no need to use a large amount of the product.
- Avoid touching your eyes, mouth and nose immediately after using an alcohol-based hand sanitizer, as it can cause irritation.
- Hand sanitizers recommended to protect against COVID-19 are alcohol-based and therefore can be flammable. Do not use before handling fire or cooking.
- Under no circumstance, drink or let children swallow an alcohol-based hand sanitizer. It can be poisonous.
- Remember that washing your hands with soap and water is also effective against COVID-19.

All the best

Your Hoo-Haz Team
